Frank Baer, a prominent miller at reensburg, Pa., has been sentenced to fourteen years in the penitentiary for urson. Some time ago his wealthy father retired from business, and placed his extensive flouring mill in his charge. The young man was ambitious to in-crease trade. In the same neighborhood were two other mills, and the three con-trolled the business of a large section of the country round about. But with the greed characteristic of the Pennsyl the greed characteristic of the Pennsylvania monopolist, young Baer didn't want any competition. He wanted the whole thing, and he hired some men to burn the rival mills down. The result burn the rival mills down. The result was extremely beneficial to his business. Just as he had expected they would do, the former customers of the other mills now flocked to his mill, and he was making money hand over fist when his successful business career was checked by the discovery of his crime.

There will be no sympathy for such a fool as Baer in Peonsylvania, remarks a

There will be no sympathy for such a fool as Baer in Peonsylvania, remarks a Chicago daily. Arson is not the regular and authorized Pennsylvania way of killing of business competition. The killing of business competition. The trust is safer and more effectual. It is trust is safer and more cust than to burn him out with fire. A man may insure himself against fire, but he can't insure himself against a trust that has decided to crush him. Baer should have organ ized a miller's trust, formed a combine with the other two mills and put up prices. His failure to apply the great Penusylvania principle can only be ac-counted for on the ground of unmature years and inexperience in business.

FOR THE LADIES

An Empress in the Harem-The Rean ties of Andalusia

Feminine Fancies and Fashions-A Hom. Queen-Department of Interest to the Ladies.

An Empress in the Harem Toe Empress Victoria Augusta had in Turkey one experience not to be match-ed in any other place in Europe. To be received as a guest, but by me alone; to be entertained with perfec devotion, but exactly as if her host was a bachelor; to find not a single woman on the premises in any capacity, and then, after twenty-four hours of this kind of life, to be taken through a side door into a walled-up section of the palace, and there, in the midst of waiting women innumerable, and of unsur-passed magnificence, to be introduced to Madame the First Wife, Madame the Secont, Madame the Third, Madame the Fourth, etc., must, of course, impart a slight impression of limited hospitality to the flavor of the entertainment previously offered in the halls ontside of the real household. This is what hap-pened to the Empress of Germany. The impression produced by the pussing glimpse of the real home of the Sultan, was heightened by the fact that in Tur-key etiquette forbids speaking to a man about his wife. The subject is very pro-perly tabooed. The man who has fallen into multiple entanglements of the heart does not care to be addressed concerning them any more than he wishe to be talked to about any other weak-

ness or failure of his life. The ladies of the harem, says a corre spondent of the New York Tribune, have had one revelation in this connection. even more startling to them than this opening of the harem door and the taste of its democratic life could have been to the Empress. The rumor that their imperial master had taken the Empress on his arm, and had driven through the streets sitting by her side in his own carriage, as no one of them could pos-sibly do, was in itself sufficiently amaz ing. But to read in all the daily papers the account of the visit of the Empress. without her husband, to the city, when the Turkish sailors manned the yards of the fleet in her honor, and when salutes were fired for her sole benefit, was a most unexpected disclosure of the heights of dignity to which a woman Not one of the harem is known, even by name to the nation, much less honore by the nation as this stranger from Germany has been honored.

The Brauties of Andalusia.

Henry T. Finck in January Scribner: As regards her stature and mold, the Andalusian girl is almost invariably a petite brunette, and although not all are plump, and many are too stout, the majority have exquisitely symmetrical tapering limbs, well-developed busts (flat-chested women are almost entirely unknown in Spain), and the most dainty and refined hands and feet. Regarding these feet Gautier makes the most astounding assertion, that "without any astounding assertion, that "without any poetic exaggeration it would be easy here in Seville to find women whose feet an infant might hold in its hands. A French girl of 7 or 8 could not wear the shoes of an Andalusian of 20." I am glad to attest that if the feet of Sevilla women and the second of the feet of Sevilla women and the second of the feet of Sevilla women and the second of the feet of Sevilla women and the second of the feet of the feet of Sevilla women and the second of the feet of the feet of Sevilla women and the second of the feet of the Sevilian women really were so mon-strously small lifty years ago, they are so no longer. It is discouraging to see a man like Gautier fall into the vulgar error of fancying that, because a small foot is a thing of beauty, therefore the smaller the foot the more beautiful it must be. Beauty of feet, hauds, and waists is a matter of proportion, not of absolute size, and too small feet, hands, and waists are not beautiful, but ugly. We might as well argue that, since man's foot ought to be larger than a woman's, therefore the larger his foot the more he has of manly beauty. If Andalusian women really had feet so small that a baby might hold them in small that a baby might hold them in its hands, they would not be able to walk at all, or, at least, not gracefully. But it is precisely their graceful guit and carriage for which they are most famed and admired. All Spanish wo-men are graceful as compared with the women of other nations, but among them all the Andalusians are pre-eminent in the poetry of motion, and this is probably the reason that, although regular facial beauty is perhaps common in Madrid than in Seville, I found that you cannot pay a greater compliment to a girl in Northern Spain than by ask-ing her if she is an Andalusian. It would be useless to seek among land animals for a gait comparable to that of the women of Seville, Cadiz, Malaga and Granada; and when you compare it to the motion of a swan on the water. a fish in the water, a bird in the air it is the birds and fishes that must feel complimented,

"Daisy." This may be called in one sense the age of slang. But after all what is called slang is frequently the giving of new meaning to old words or the invention of new words from old roots. The slang of to-day becomes the elegant language of to-morrow. It is in-teresting to know how many of the est words and even parases which were once regarded as slangy and inelegant became part of the polite language of the times. Words, like lives, have a biography, says a writer in the Pittsburg Dispatch. Many words, instead, have histories of important personages and events in the affairs of the world. This makes the history of a word often as interesting and as valuable as that of individuals. 'Dun" is a word now whose mean-

ing is known to every one who understands the English language. Too stands the English language. Too many wish they did not know it. Yet at the beginning of this century it was unknown as a verb. About that time a constable in England named John Dun became celebrated as a first-class collector of bad accounts. When others would fail to collect a bad debt Dun would be sure to get it out of the debtor. So well known did this become that people from the surrounding country seat him their accounts when they could not collect them. It soon passed into a current phrase that when a person owed money and did not pay when asked he would have to be "Dunned." Hence it soon became common in such cases to say, "You will have to Dun So-and-so if you wish to collect your

"Chestnuts," in reference to repeating stories which are old, is new, and not much can be said in its favor except that, being a word that is not inelegant either in sound or origin, and expressing so much in two syllables, it has probably come to stay with us. Its origin is not positively known, and only two probable sources are given. One is that some shrewd wit, seeing an analogy between the propensity of a joke to become stale and flat quickly, and the chestnut to become wormy in a few days, applied the word "chestnut" to a joke when repeated too often and palmed off as new on a company which had heard it so frequently as to come bored.

This may be its origin, but many are inclined to attribute it to the other alleged source-to wit: That a theatrical party traveling on a train and trying to beguile the weary hours by reading and telling stories, bought a reading and telling stories, bought a Extract is made from precisely the lot of chestnuts at a station to help pass same formula, only from pure materithe time. A little bell in the party "Ex was to be rung whenever a stale joke was perpetrated as a signal that all were to fling a chestnut at the offender.

You are a daisy," is considered very slangy by those who use it indiscriminately, and oftentimes it is. But if used in the sense in which its inventor. Charles Dickens, intended it, it is good and forcible. In "David Copper-field" it is first used in the sense of calling a person a daisy in a way to express admiration, and, at the same time, to laugh at one's credulity. Steerforth says to young Copperfield: "David, my daisy, you are so innocent of the world. Let me call you my daisy, as it is so refreshing to find one in these corrupt days so innocent and unsophisticated. My dear Copperfield,

"Too thin" is a two-worded phrase heard in all classes of society. By some it is used in a vulgar sense, and it is objectionable slang; by others it is used in the manner which gave it to us as a good word. To say when speak-ing of an action, "Oh, that's too thin," is vulgar slang, because an action can-not be thin. But to say, when a person makes a statement which is calculated to mislead, "Oh.that is too thin," is not slang It was given currency by the Hon. Alexander H. Stephens of Georgia in the United States congress in 1870. Some member had made a reply to Mr. Stephens and the latter had his chair wheeled out in the aisle and said in that shrill, piping voice which always commanded silence: "Mr. Speaker, the gentleman's arguments are gratuitous assertions made up of whole cloth. And cloth, sir, so gauzy and thin that it will not hold

water. It is entirely too thin, sir.' One of the best words we have is "agnosticism," yet its inventor, Pro-fessor John Tyndall, the great scientist, says that when he used it he had no idea it would pe used again or that would be misunderstood in using it. He could find no other, he says, to convey an idea of his religious belief in answer to some churchmen that he told, what he did believe. Hence he invented "agnosticism," meaning "the unknowable" It is only about fifteen years old.

Ledger. The paper was started as the organ of that faction which 'never was and never can be whipped, be ---, sah,' and the office was headquarters for nearly a regiment of colonels without ds and doctors without patients. Most of them had adopted journalism as a pastime, but all of them exhibited all the eagerness of the traditional thrifty Yankee to see their names stand over against fat salary figures on

Then with a majestic wave of the hand the sweeping invitation was extended to all present: 'Me boy, le's go git a cawktail.' And this would be the last seen of the 'editor' till from 12 to 2 o'clock in the morning, when, after spending half the night in 'painting the town,' he would wander into the office about time the paper should go to press, demand to see a 'proof of

He was at the time he came to Louisville about 69 years old, tall, straight as an arrow. lithe as a panther and fearless as a lion. Chivalrous himself, he could brook no poltroonery in others—and his idea of bringing up a struggling newspaper was to fight duels! With his tall form surmounted by a widebrimmed sombrero, long curling locks sweeping down over the shoulders of his cape, his gold-headed cane and his military style and stride, he made a picturesque figurehead, but a poor managing editor, for a journal striving to make head against a powerful and well established rival.

One morning as the colonel came to the office he encountered the business manager, who, with a sad face, announced that the paper was running far behind financially, and in tremulous tones asked the question: 'What are we to do?' 'Do?' piped the gallant Mississippian in his peculiar faisetto voice, 'do?' Git a gun! Go out and fight, or git a man to stand up before me! De d—n papah's gone to hell if somebody don't fight! Contains no alcohol, don't inebriate or manufacture topers; is free from syrup or sugar, and, therefore, don't sour or ferment in the stomach, intertering with digestion: no alcohol, don't inebriate or manufacture topers; is free from syrup or sugar, and, therefore, don't sur or ferment in the stomach, interfering with digestion; as peculiar in its wonderful curative effects as in its compession. There is no other medicine at all like it, either in composition or effect. Therefore, don't be fooled into accepting something instead, said to be "just as good." If substitutes are "just as good," why don't their vendors guarantee them to do what they are recommended to, or refund money paid for them, as we do with all who buy "Golden Medical Discovery?" For the very good reason that such a plan of sale would bankrupt the manufacturers of any but an extraordinary remedy like the "Discovery." To purify the blood, invigorate the liver, promote digestion, and build up both flesh and strength, it is unequaled, whether for adults or children. CONSUMPTION As all the world is now either rolling rais in the incident in the rolling rais in the rolling raise rai How Ten-Pin Balls are Made. or talking about ten pins an inquirer from the Rochester Post-Express sought for some information about the most GREAT OHIO

essential appurtenances of the game and applied to Frank Schwikert, the billiard PROSPECTING MACHINI table manufacturer, for information about the balls and pins which he makes. He said: "The balls are made of lignum vitae, which grows in South America and is imported by deniers in CATALOGUE FREE. New York. The trees grow to be lifteen inches in diameter, but the outside of LOOMIS & NYMAN. the wood is not hard enough to make a good ball and we use only the heart of the tree. The largest balls usually made are eight inches in diameter, while the smallest ones are four inches. Twelve balls constitute a set for one alley, and they are worth from \$1.50 to \$3,50 each. They are turned in a lathe by a tool which moves in a true circle, and will make a ball from an inch to a foot in size. The block of wood is set in a chuck and one end is turned into a hemisphere. It is then changed around and the other end presented to the tool and the ball is nearly linished, needing only to be finished with sandpaper and polished, all of the work being done in the lathe. The balls get 'out of true from use and they have to be turned occasionally." The pins are usually made of maple and are turned in a

lathe. Four Men Roasted and Eaten. The Sydney Herald says that, according to a letter received from Cantain Wood house, of the trading schooner Elma Fisher, the boat-steerer, Nelson, of the schooner Enterprise, of Sydney, and three of the native crew of the Enterprise were killed and eaten by the cannibals of the Solomon Islands. The En-terprise was trading among the islands, and the natives from Hammond Island, one of the Sciomon group, induced Nelson and the others to go ashore to make some purchases. Once on shore they were knocked on the head, and it is reported that the bodies were then roasted and eaten. The letter states that Her Majesty's ship Royalist shelled the villages on the islands on Captain Hand

CURED.

After spending Ten Winters South, was Cured by Scott's Emulsion. 145 Centre St., New York, } June 25th, 1888.

The Winter after the great fire in Chicago I contracted Bronchial affections, and since then have been obliged to spend nearly every Winter South. Last November was advised to try South's Emulsion of Cod Liver Oil with Hypophosphites and to my surprise was relieved at ence, and by centinuing its use three menths was entirely cured, gained flesh and strength and was able to stand even the Silzzard and attend to business every day.
